

Evacuation Management

Evacuation Reports, SMS Head Counts, Real-time Info

*The world's best people presence software
for the world's best price.*

- ▶ Who is onsite now?
- ▶ Who needs assistance?
- ▶ What is our head count?
- ▶ How do we get access to reports?

1 Free 30 Day Trial

We offer a free 30 day, no obligation trial.

- > Email sales@whosonlocation.com
- > We get you up and running in a day
- > Your trial includes SMS head count alerts and online user-training.

2 Easy to Deploy

WhosOnLocation Evacuation Management is web-based.

Deploy it to any user, anywhere in the world.

- > All time zones supported
- > No software to download
- > Access from any Browser.

3 Who is Onsite Now?

At the heart of evacuation management is knowing who is onsite, in real-time, when the evacuation event occurs. In order to access this critical information you must track and manage visitor, contractor, and employee presence into and out of your sites. WhosOnLocation provides all the tools you need.

4 Help in your time of need

- > Evacuation Buddy
- > One of your organisation's locations e.g. Head Office, can support another, e.g. Operations Office.
- > Online Support anytime.

Evacuation Assistance when you need it.

Employee Presence

- > Records list of current employees for each location
- > Employees can scan in and out of each location OR
- > Sign into a location from their own PC OR
- > Can be signed into a location by a receptionist or security guard.
- > Indicates if the employee would need assistance to evacuate the location.

Evacuation Reports

- > Reception can generate a real-time Evacuation Report
 - Employees only
 - Contractors and Visitors only
 - All
- > Reports show
 - Name
 - Organisation
 - Mobile (if recorded)
 - Need Assistance status.

Evacuation Buddy

An Evacuation Buddy is any 3rd party organisation, located reasonably close by, whom you have a good relationship with. When your evacuation alarm sounds you:

- > Activate your Evacuation Buddy.
- > This sends the Evacuation Report to the Evacuation Buddy (probably the Evacuation Buddy's receptionist).
- > They print it off and
- > Your team uplift it.

Contractor Presence

- > Records list of current Contractors
- > Contractors scan in and out of each location or
- > Can be signed into a location by a receptionist or security guard.
- > Indicates if the contractor would need assistance to evacuate the location.

Access from outside situation of risk

- > Being a web-based tool users can access the Evacuation tools from outside the situation of risk
- > Simply login via iPad, or other tablet, laptop, or a neighbouring organisations internet connection

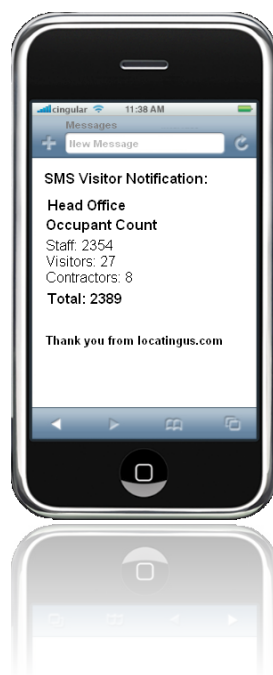

SMS Head Count

Setup floor and Safety teams as SMS Head Count Recipients. When your evacuation alarm sounds you:

- > Activate your SMS Head Count.
- > This sends the current real-time head count to the recipients.
- > Your team then reconcile head count statistics with actual people accounted for.
- > If your actual head count does not reconcile with your SMS Head Count then activate your Evacuation Buddy or run your Evacuation Report. Use the report, which includes employee, visitor, and contractor names, to identify who is unaccounted for.

Visitor Presence

- > Records visitor traffic via reception or a visitor kiosk.
- > Captures who their host is
- > Indicates if the visitor would need assistance to evacuate the location.

Works with these other great WhosOnLocation features!
